

Unmanaged 10/100Mbps PoE+ Switch

MODEL: TL-SL1218MP/TL-SL1218P/TL-SL1226P

Highlights

- (For TL-SL1218P) 16 PoE+ 10/100 Mbps RJ45 ports, 2 Gigabit RJ45 ports and 1 combo Gigabit SFP slot
- (For TL-SL1218MP/TL-SL1226P) 16/24 PoE+ 10/100 Mbps RJ45 ports, 2 Gigabit RJ45 ports and 2 combo Gigabit SFP slots
- High PoE power budget with up to 30 W* for each PoE port, and a total power budget of 150 W* (for TL-SL1218P)/250 W* (for TL-SL1218MP and TL-SL1226P)
- Up to 250 m data and power transmission under Extend Mode** specially designed for surveillance system
- Priority mode for port 1–8 to guarantee the quality of sensitive applications like video monitor
- Isolation Mode allows one-click client traffic separation for higher security and performance
- Easy to use, with no configuration and installation needed

Overview

TP-Link's new PoE/PoE+ switches with all 10/100 Mbps RJ45 ports supporting the PoE+ standard provides a simple way to expand the wired network while transferring power over the same ethernet cable at the same time. With up to 30 W* per port, the switch can power more high-powered devices such as Access Points, IP Cameras, IP Phones and so on. Moreover, with innovative Extend Mode, devices can get PoE power supply and data transmission from a distance of 250 m**. Priority mode ensures high priority for port 1–8, which guarantees the quality of sensitive applications. Moreover, the switch supports Isolation Mode that divides traffic for 10/100 Mbps RJ45 ports for higher security and performance.

Power over Ethernet

- (For TL-SL1218P) Features 16 802.3af/at compliant PoE+ ports, with a total PoE power budget of 150 W*
- (For TL-SL1218MP/TL-SL1226P) Features 16/24 802.3af/at compliant PoE+ ports, with a total PoE power budget of 250 W*
- Flexible deployment for PoE supported devices such as wireless access points, IP Phones and IP Cameras
- Designed to use a single Ethernet cable for both data and power transmission, lowering infrastructure costs

Highlight Performance

- Up to 250 m PoE power supply and data transmission under Extend Mode**.
- After turning on the Priority Mode, there will be designated high priority ports for quality-sensitive application like Surveillance Video.
- Isolation Mode easily divides traffic for 10/100 Mbps RJ45 ports to avoid snooping and tampering, which improves LAN security and performance.

Easy to Use

- Plug & play, no configuration required
- Auto MDI/MDIX eliminates the need for crossover cables
- Auto-negotiation intelligently adjusts for compatibility and optimal performance

Note:

^{*} PoE budget calculations are based on laboratory testing. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and

^{**}The speed of the ports which are under extend mode will be downgraded to 10Mbps. Actual transmission distance may vary from the quality of the cables.
